

REMARKS

Independent claims 1 and 10 are amended to more clearly recite the operation of the subject matter claimed. In particular, the term "in fluid communication between" has been replaced with "in fluid communication with". Also, the phrases with respect to the "on" and "off" positions of the control unit and by-pass valve are reworded to more clearly reflect the operation in those positions.

It is respectfully submitted that independent claims 1 and 10 and each of the claims depending therefrom clearly define the subject matter and operation of the present invention.

Accordingly, in light of the above discussion and in view of the present amendment, the present application is believed to be a condition for allowance and an early and favourable action to that effect is respectfully requested.

Respectfully submitted,

Robert A. Vincent
